Environmental Science: Example Textbook List

The list below represents examples of textbooks that meet the curricular requirements of AP Environmental Science. The list below is not exhaustive and the texts listed should not be regarded as endorsed, authorized, recommended, or approved by the College Board. Not using a book from this list does not mean that a course will not receive authorization. Syllabi submitted as part of the AP Course Audit process will be evaluated holistically, with textbooks considered along with supplementary, supporting resources to confirm that the course as a whole provides students with the content delineated in the curricular requirements of the AP Course Audit. For discussions of the usefulness of these texts and other teaching materials in the AP Environmental Science classroom, please consult the Teachers' Resources section of AP Central.

▪ [Teachers' Resources](#)

More textbooks than those listed below may be appropriate for the AP Environmental Science course. However, schools should make every effort to acquire textbooks no older than five years old for use in this course.

Botkin, Daniel B., and Edward A. Keller. *Environmental Science: Earth as a Living Planet*. New York: John Wiley & Sons.

Berg, Linda, and Peter H. Raven. *Environment*. New York: John Wiley & Sons.
