Physics Interactive Quiz : Fields Name:

# 1 question meters is the distance between two charges of 6 C each. Find the force between the two charges # 1 5 what will be the new force if the distance is three times as far? # 2 5 cm is the distance between the front and the rear of a 25,000Volt TV tube. Find the strength of the electric field # 3 12 find the value for this field in Newtons/ Coulomb # 4 12		ııys		leractive Quiz . Fielus	140	aiiie.	
meters is the distance between two charges of 6 C each. Find the force between the two charges # 1 5 what will be the new force if the distance is three times as far? # 2 5 cm is the distance between the front and the rear of a 25,000Volt TV tube. Find the strength of the electric field # 3 12 c find the value for this field in Newtons/ Coulomb # 4 12 c 0 What force would this exert on an electron? # 5 12 c 0 what is the acceleration of an electron in this field? # 6 12 c 0 how fast will this electron be moving when it hits the TV screen? # 7 12 c 0 how many joules of KE is this? # 8 12 c 0 divide this amount of KE by the distance		#	1	question	Answer	0	<score< th=""></score<>
what will be the new force if the distance is three times as far? # 2 5 00 cm is the distance between the front and the rear of a 25,000Volt TV tube. Find the strength of the electric field # 3 12 00 find the value for this field in Newtons/ Coulomb # 4 12 00 What force would this exert on an electron? # 5 12 00 what is the acceleration of an electron in this field? # 6 12 00 how fast will this electron be moving when it hits the TV screen? # 7 12 00 how many joules of KE is this? # 8 12 00 divide this amount of KE by the distance # 9 12 divide this by the charge on the electron				of 6 C each. Find the force between the two			
three times as far? # 2 5 cm is the distance between the front and the rear of a 25,000 Volt TV tube. Find the strength of the electric field # 3 12 0 find the value for this field in Newtons/ Coulomb # 4 12 0 What force would this exert on an electron? # 5 12 0 what is the acceleration of an electron in this field? # 6 12 0 how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance	#	1	5			0	
m is the distance between the front and the rear of a 25,000Volt TV tube. Find the strength of the electric field # 3 12 0 find the value for this field in Newtons/ Coulomb # 4 12 0 What force would this exert on an electron? # 5 12 0 what is the acceleration of an electron in this field? # 6 12 0 how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron				\$			
the rear of a 25,000Volt TV tube. Find the strength of the electric field # 3 12	#	2	5			0	
find the value for this field in Newtons/ Coulomb # 4 12 0 What force would this exert on an electron? # 5 12 0 what is the acceleration of an electron in this field? # 6 12 0 how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron	#	3	12	the rear of a 25,000Volt TV tube. Find the strength of the electric field		0	
# 5 12 0 what is the acceleration of an electron in this field? # 6 12 0 how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron			1.2	Coulomb		0	
# 5 12 0 what is the acceleration of an electron in this field? 0 how fast will this electron be moving when it hits the TV screen? 0 how many joules of KE is this? 0 divide this amount of KE by the distance # 9 12 divide this by the charge on the electron	#	4	12			0	
what is the acceleration of an electron in this field? # 6 12 0 how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron	ш	-	1.2			0	
how fast will this electron be moving when it hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron	#	Э	12	what is the acceleration of an electron in		0	
hits the TV screen? # 7 12 0 how many joules of KE is this? # 8 12 0 divide this amount of KE by the distance # 9 12 0 divide this by the charge on the electron	#	6	12			0	
# 8 12 0 divide this amount of KE by the distance				_			
# 8 12 O divide this amount of KE by the distance O divide this by the charge on the electron	#	7	12			0	
# 9 12 O divide this by the charge on the electron				how many joules of KE is this?			
# 9 12 O divide this by the charge on the electron	#	8	12			0	
divide this by the charge on the electron				divide this amount of KE by the distance			
	#	9	12	\		0	
# 10 12 0				divide this by the charge on the electron			
	#	10	12			0
