The Basics

Passwords

- ✦ Use the Password Assistant
- ✦ Test with John The Ripper
- ✦ Avoid Dictionary Words
- ✦ Think Passphrase
- ✦ p@\$\$w0rd doesn't cut it

Firewall

- ✦ At your Network
- ✦ On your Computer
- ✦ On your Server
- ✦ Always Test
- ✦ Stealth Mode

Spam Spoof Virus Trojan

- ✦ Active Security
- ✦ IDS intrusion detection
- ✦ Scan your email
- ✦ Keep your system upto date
- ✦ Just because it's a Mac...

Case Study

My Office was broken into

- ✦ It can happen to you
- ✦ but I have an alarm
- ✦ We have security
- ✦ As Forest Gump says...
“ It Happens.”

CSI is a Fantasy

- I had to beg them to take fingerprints off a computer
- Phone Traces cost \$\$\$
- Only a small fraction of property crimes go to court

Overlooked Aspects

My Office was broken into

- ✦ It can happen to you
- ✦ But I have an alarm
- ✦ We have security
- ✦ As Forest Gump says...
“ It Happens.”

Physical Security

Review What You Have

- ✦ Bars on Windows Are Ugly
- ✦ Deadbolt weaness
- ✦ Video Surveilance
- ✦ Who shows up for your alarm?
- ✦ How strong are your doors?

Disaster Recovery

They took my...

- ✦ My Laptop with all my data?
- ✦ Server
- ✦ My Data
- ✦ My Backup Drives
- ✦ Your Future?

Can your business go on if?

- They steal everything
- Your Office Burns Down
- How quick can you be up and running again?

So What happened?
And What Do I Do?

We found the criminals

- ✦ Selling a MacPro on Craigslist
- ✦ Set Up A Sting
- ✦ Waiting for A Trial

Computer Forensics Are Fun

- Created Account Same Day As Theft
- Recovered Drive tied them to both break-ins. Thank You DataRescue
- How quick can you be up and running again?

What else can you do?

- ✦ LoJack, Orbicule
(avoid)
- ✦ Offsite Backup
- ✦ Data in the Cloud or in a Colo
- ✦ Video Cameras
(all are not equal)
- ✦ Inventory Your Stuff
- ✦ Key Only Deadbolts
- ✦ Slow them down
