Working on Three Screens

Marshall Clow   **marshall@idio.com**

What three screens?

* Mac

* iPad

* iPhone

What do each of them do best?

Macintosh

* A general purpose computer

* A file system for storing data

* Large screen, keyboard, mouse

* Easy to attach peripherals

* Syncs data to iPad/iPhone

iPad

* Easy to carry around

* Clipboard sized; fits in your lap

* Touch screen

iPhone

* Fits in my pocket

* Makes phone calls

* Knows where it is

* Does not depend on Wi-Fi

What do I do with these devices? (1)

✳ Email

✳ Software development & testing

✳ Reading news

✳ Twitter

What do I do with these devices? (2)

* Research

* Games

* Take pictures

* Watch movies

What do I do with these devices? (3)

✳ Listen to music

✳ Hand around to show people

✳ Write papers/articles/other stuff (like this presentation)

✳

What Applications do I use?

✳ On the Mac

✳ On the iPad

✳ On the iPhone

On the Mac

- ✳ iWork

- ✳ MS Office

- ✳ BBEdit

- ✳ Xcode

- ✳ OmniFocus/Outliner

- ✳ Lots of others

On the iPad

* SimpleNote

* GoodReader

* Solitaire

* Twitter

* InstaPaper

* etc.

On the iPhone

* Maps

* Safari

* Soduku

How do I share data between devices?

❋ iTunes

❋ DropBox

❋ Evernote

❋ SimpleNote

❋ Yojimbo

❋ Google Docs

❋ MS Exchange (at work)

What else?

What do I wish worked better?

✳ Better syncing; iTunes hasn't scaled well

✳ Some general mechanism for sharing data; every developer has to solve the same problems for themselves.

✳ More storage; I can fill up an iPad with photos (for a family party, say) quite easily.

Latest news?

✳ Things that I've seen here this week.....
