

S143

Pro without tears

Graduate to Apple Logic

Peter Kirn

Macworld Conference & Expo, Boston 2005

Why?

- More instruments
- More effects
- Notation you can edit and print
- Video
- Real control (everything from tempo to precise editing)
- Exchanging files *(and lots of other reasons)*

Logic Pros

Thievery Corporation

Create a New Project

Import your GarageBand projects
Templates and the project view

Loops Browser and Arrangement

Logic Pro and loops

Playing GarageBand instruments

Where your GarageBand instruments are hiding
Virtual instruments in Logic
Why can't I hear anything?

What do all these windows do?

Basic editing of audio and *MIDI*
Power of the channel strip

Environment?! Audio Object??!

You're not in bio-dome:
Logic's abstractions

Understanding Cardassian Technology

Where to start with some out-of-this world instruments

Sculpture

Ultrabeat

Keyboards

Scores, video, Life

Real notation printing, real MIDI export, imagery
Integrate with Final Cut Studio and iLife
