# LM: Wireless Fundamentals - What You Need to Know to Setup and Use Your Wireless Networks with Safety and Reliability

Conference: [Hands-on MacLabs](#)

Session Code: LM

Speaker:

[Dr. Bill Wiecking](#) – *Hawaii Preparatory Academy*

January 17, 2008

10:00am - 12:00pm

Session Description:

[Download this lab to iCal](#)

Learn the difference between wired and wireless networks, and how best to setup, diagnose and secure these networks. Five steps to basic wireless security and common errors many folks make in wireless setup and use. Case studies will demonstrate how to make the best of your SOHO, campus or enterprise wireless network. How to become a much safer wireless network user, and how to work with other platforms. Laptop and iPhone integration will be covered in depth, as well as VPN, RADIUS and WPA2. Hands-on lessons will make you the one folks ask for the answers.
